DETAILED ACTION

REJECTIONS WITHDRAWN

There are no rejections withdrawn.

REJECTIONS REPEATED

All of the 35 USC 103(a) rejections and obviousness-type double patenting rejections set forth in the non-final rejection of 1/11/05, pages 2-6, paragraphs 5-10 are repeated for the reasons of record.

NEW REJECTIONS

There are no new rejections

ANSWERS TO APPLICANT'S ARGUMENTS

Applicant's arguments filed 6/16/05 have been carefully considered but are deemed unpersuasive.

Applicant has argued that Valyi fails to disclose applicant's expanded neck. However, Valyi discloses that the finish is kept from moving axially by expansion of the preform under flange 22 (column 4, lines 23-25). The area adjacent the flange, that is the area above and below the flange are part of the neck (see especially Fig. 4). Therefore, in contrast to applicant's assertion, Valyi disclose an expanded neck.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by

combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the references are combinable because both deal with blow molded containers and Tsukada provides the clear motivation of stabilizing the neck section physically.

In response to applicant's argument that Tsukada is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Tsukada is directly related to applicant's field of endeavor since Tsukada is drawn to a blow molded container having crystallized to stabilize the neck section.

Applicant provides substantially the same arguments as presented above against the obviousness-type double patenting rejections and for the patentability of the instant dependent claims to which the examiner incorporates by reference the arguments presented above.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
